

# EMISSION-PAK®

## SERIES 7000 AND 9000

### BALL VALVES

The *Emission-Pak* provides a simple and economical method to meet emissions standards. It is supplied as a factory mounted valve assembly.

The *Emission-Pak* has a double-packed, live-loaded V-ring stem seal design, which utilizes stacked and guided spring washers to maintain a constant packing force without over-compression. The *Emission-Pak* is mounted on the valve and retained by a bolt pattern that requires low clamping force to secure it to the valve bonnet. A second bolt pattern allows easy actuator installation for automated operation without disturbing any pressure-retaining bolts. A special TFM and a graphite gasket on the mounting face of the *Emission-Pak* maintains a leak-free joint at the valve bonnet, and assures that a Fire-Tite® valve retains its fire-tested rating.

#### FEATURES

- Double-packed, live loaded v-ring stem seals effectively eliminate emissions while extending cycle life.
- One piece internal entry stem for stem retention.
- Dual thrust bearings secure stem in position and prolong valve life.
- Available in a wide range of corrosion resistant trim materials.
- Unique graphite gasket retains the fire-tested rating of a *Fire-Tite* valve to API 607 4th edition.
- Optional stem seal monitoring port permits early detection of primary seal wear.
- Qualified to ISO 15848 for 1/2" – 2" (DN 15 – 50) 7000 and 1/2" – 1-1/2" (DN 15 – 40) 9000. 3" – 8" (DN 80 – 200) 7000 and 2" – 6" (DN 50 – 150) 9000 qualified to 40CFR EPA Method 21. ISO 15848 Qualification in process.
- Permits easy mounting of actuators and accessories without disturbing pressure retaining bolts. Bonnet is the same as the valve to allow use of the same mounting hardware and accessories, including stem extensions, locking devices and optional handles.

#### CE Marked

CE marked and documented valves 9180 and 9380 which meet the European Pressure Equipment Directive (PED) 97/23/EC are available in ANSI Class 150/300. CE marked products also meet the requirements of BS5351, including static grounding. Operating torques, construction options and valve dimensions are exactly the same as the standard ANSI 150/300 offering (see page 12 for ordering instructions).

#### SPECIFICATIONS

##### Temperature

The *Emission-Pak* is suitable for use in temperature ranges from -100°F to +500°F (-73°C to +260°C) in 316 stainless steel, and -20°F to +500°F (-29°C to +260°C) in carbon steel.

#### AVAILABLE CONFIGURATIONS

Standard Bore Valves		
Valve	Size Range	ANSI Class
7150, 7180	1/2" – 6" (DN 15 – 150)	150
730S	1/2" – 6" (DN 15 – 150)	300
7300, 7380	1/2" – 6" (DN 15 – 150)	300
Full Bore Valves		
Valve	Size Range	ANSI Class
9150, 9180	1/2" – 6" (DN 15 – 150)	150
9300, 9380	1/2" – 4" (DN 15 – 100)	300

## SPECIFICATIONS

### Flow Data

The table at right provides flow coefficients for JAMESBURY® valves covered in this bulletin. Cv values represent the flow of water at +60°F through the valve in U.S. gallons per minute at a pressure drop of 1 psi. The metric equivalent, Kv, is the flow of water at 16°C through the valve in cubic meters per hour at a pressure drop of 1 kg/cm<sup>2</sup>. To convert Cv to Kv, multiply by 0.8569.

Valve Size		Cv	
Inches	DN	Standard Bore	Full Bore
1/2	15	9	9
3/4	20	19	50
1	25	45	100
1-1/2	40	125	270
2	50	165	490
3	80	350	1160
4	100	550	2200
6	150	765	5100

\*In accordance with ASME B16-34-2004

### Valve Body Ratings

These are the maximum working pressure ratings of the valve body only. The seat ratings, shown on the next page, determine the practical pressure limitations according to actual service conditions. Test pressures are recommended pressures for hydrostatic test with ball half open.

Maximum Working Pressure, psi				
Temp °F	Class 150		Class 300	
	Carbon steel*	316 Stainless steel*	Carbon steel*	316 Stainless steel*
-20 to 100	285	275	740	720
200	260	235	680	620
300	230	215	655	560
400	200	195	635	515
500	170	170	605	480
Test Pressure	450	425	1125	1100

Maximum Working Pressure, bar				
Temp °F	Class 150		Class 300	
	Carbon steel*	316 Stainless steel*	Carbon steel*	316 Stainless steel*
-29 to 38	19.6	19.0	51.1	49.6
100	17.7	16.2	46.6	42.2
150	15.8	14.8	45.1	38.5
200	13.8	13.7	43.8	35.7
250	12.1	12.1	41.9	33.4
Test Pressure	30	29	77	75

\* In accordance with ASME B16.34-2004

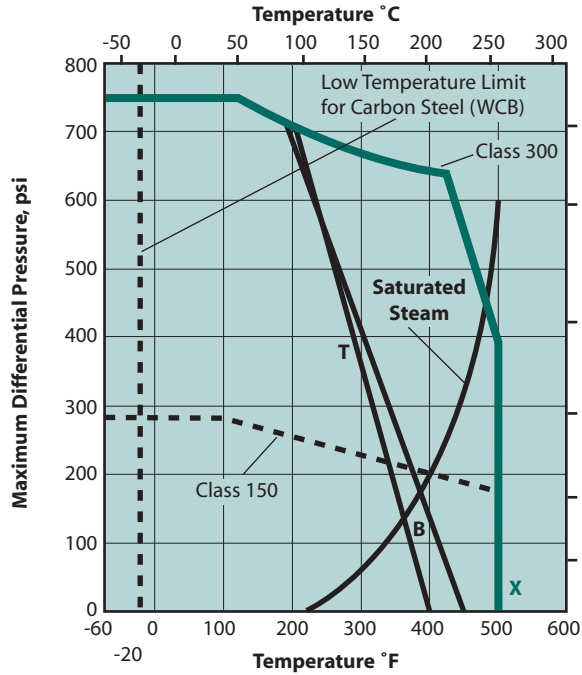

### Valve Seat Ratings

Seat ratings, indicated by solid lines in the charts on the next page, are based on differential pressure with the valve ball in the fully closed position and refer to seats only. The dotted lines indicate maximum working pressures for *WCB carbon steel* valve bodies. (Maximum working pressures of other body materials are shown in the tables above.) The combination of dotted and solid lines indicates the maximum valve rating at specific pressure and temperature conditions.

Valves with PTFE and Xtreme® can be used in service to -100°F (-73°C) provided that the valve body material is suitable for such a temperature. Carbon steel valves are rated to -20°F (-29°C).

For applications information on seat materials, refer to Bulletin T140-1.

**1/2" – 2" (DN 15 – 50) Standard Bore  
3/4" – 1-1/2" (DN 20 – 40) Full Bore**

**3" – 6" (DN 80 – 150) Standard Bore  
2" – 4" (DN 50 – 100) Full Bore**

**Xtreme Performance and Value**

*Xtreme* seats provide longer life, expanded performance boundaries, and the greatest possible value. *Xtreme* is a unique material that resulted from a technological break-through in our polymer research lab. The material is a fluoro-polymer-based blend proprietary to JAMESBURY that provides superior quarter-turn performance at elevated temperature and pressure.

1/2 – 2" (DN 15 – 50) Series 7000, 1/2 – 1-1/2" (DN 15 – 40) Series 9000

**Qualification Test**

*Emission-Pak* 1/2" – 2" (DN 15 – 50) 7000 series and 1/2" – 1-1/2" (DN 15 – 40) 9000 series are qualified to (draft) ISO 15848 BH-CC3-55A3-T200. Results and procedures are available on request.

Stem guide eliminates side loads and assures accurate alignment.

Computer designed double-packing and live-loaded stem seals provide consistent packing force, thermal and pressure cycle resistance, and extend valve life.

Non-pressure retaining actuator bolt pattern permits simplified, in-line mounting of automatic actuator.

Rigid stem design is supported by dual thrust bearings for extended cycle life and thermal cycle capability.

Optional monitoring port facilitates testing of primary seal and allows detection of any potential leakage problem.

Graphite and TFM gaskets provide superior, reliable bonnet-to-cartridge interface and sealing performance while providing a fire tested joint.

3" – 8" (DN 80 – 200) 7000 and 2" – 6" (DN 50 – 150) 9000 series with *Emission-Pak* are qualified in accordance 40CFR60 EPA Method 21 test procedure. Results are available on request. Qualification to ISO 15848 is in process.

107	Tee Handle	Ductile Iron		
108	Retaining Ring	Inconel® X-750		

Refer to appropriate valve bulletin for a complete list of valve parts.

\* Supplied when optional leak-off connection is specified.

\*\* Not applicable for graphite stem seal arrangement.

† Meets NACE MR-0103

### VALVE TORQUE DATA

Use these torque charts as a guide for actuator selection. Additional requirements may be imposed by media characteristics, trim, and frequency of valve operation. For clean lubricating fluid service, required torque for PTFE (T) and Xtreme (X) seated valves only may be reduced 20% when the valve is equipped with corrosion resistant trim. For difficult services such as slurries and semi-solids, and for oxygen, increase values by 50%. If in doubt, err on the side of safety by using a larger actuator than would normally be selected.

Torque output values and actuator selection tables for the different types of JAMESBURY actuators are contained in the bulletins listed below.

Manual Gear Actuators	A100-1
B-Series Piston Actuators	6B20
Quadra-Powr X® Spring Diaphragm	
Rotary Actuators	A110-4
Valv-Powr® Series VPVL	A111-3
VPVL Stainless Steel	A111-4
V-Series Electric Actuators	A200-1
ADC-Series Electric Actuators	A201-1

### ANSI Class 150 and 300 Valve Torque Data

#### PTFE (T) Seated Valves

#### Xtreme (X) Seated Valves

FB = Full Bore SB = Standard

## HOW TO ORDER *EMISSION-PAK* ASSEMBLY WITH SERIES 7000 AND 9000 POLYMERIC SEATED BALL VALVES

**Example:** This example is for a 3" ANSI Class 300, full bore ball valve of standard construction with a carbon steel body, stainless steel ball, stainless stem, *Xtreme* seats, PTFE packing, and B7 bolting. The valve is complete with a standard *Emission-Pak* without a leak-off connection.

<b>1</b>	<b>2</b>	<b>3</b>	<b>—</b>	<b>4</b>	<b>—</b>	<b>5</b>	<b>6</b>	<b>7</b>	<b>—</b>	<b>8</b>
