

Series GU control valves globe-single seated, top guided

Metso's Neles series GU single seated, top guided globe valves are economical high-performance control valves designed to provide the best possible control accuracy and wide rangeability with the all inherent benefits of linear control valves. Standard units are equipped with spring diaphragm actuators and ND9000[®] intelligent valve controllers for precise flow control, extended operational life and performance monitoring on-line.

Construction

- Compact and lightweight construction
- Wide variety of trims with different Cv and characteristics
- Both metal and soft seat available depending from the application
- Option for bellows seal for toxic or other application where no leak is allowed
- Wide material selection for different applications
- Many end connection styles available for different applications
- Extension bonnet design for wide temperature range

Accurate control

- ND9000 digital valve controller for auto-calibration and accurate control
- Accurate and sensitive diaphragm and piston actuators

Wide range of applications

- Suitable for gas, liquid and steam
- Temperature limits -29 ... +260 °C with standard bonnet construction. Over +260 °C and under -29 °C with extension bonnet.
- Tendril multi-hole and multi-stage trim for high pressure drop and cavitation applications
- Multi groove trim for low Cv, non-compressible fluids to prevent cavitation and erosion
- Micro trim for small flow and/or to get rid of the stability problems in high pressure drop application

Safety and quality

- Rugged one piece body structure to minimize the leak paths and makes the valve insensitive to pipe stress
- Strictly tested to ensure specified performance with quality assurance systems in according to ISO 9001
- Certified ISO 15848 fugitive emissions
- Certified CE/PED & ATEX, TSG & EAC (GOST-R)

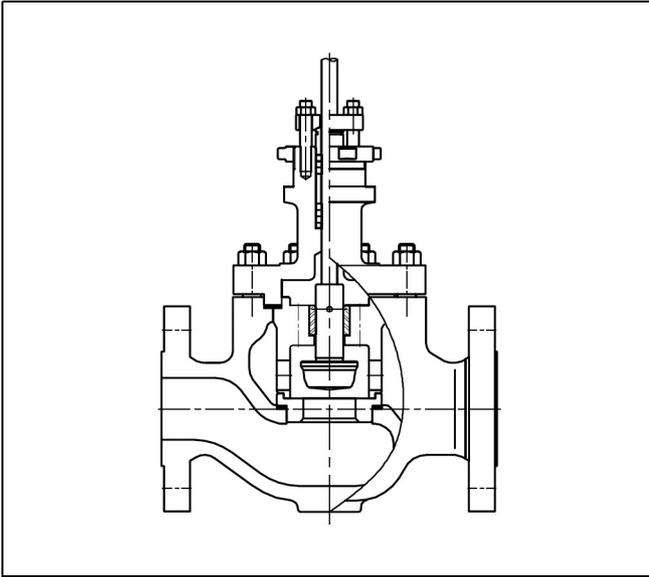

Easy maintenance

- Quick change trim and top entry construction for easy in-line maintenance
- Valve assembly is easy and self guiding
- Flow characteristics can be easily changed with interchangeable trim parts
- ND9000 digital valve controller with online diagnostics enables performance follow up and predictive maintenance
- Efficient asset management with Metso FieldCare open architecture software and excellent networking capabilities

Different trim designs

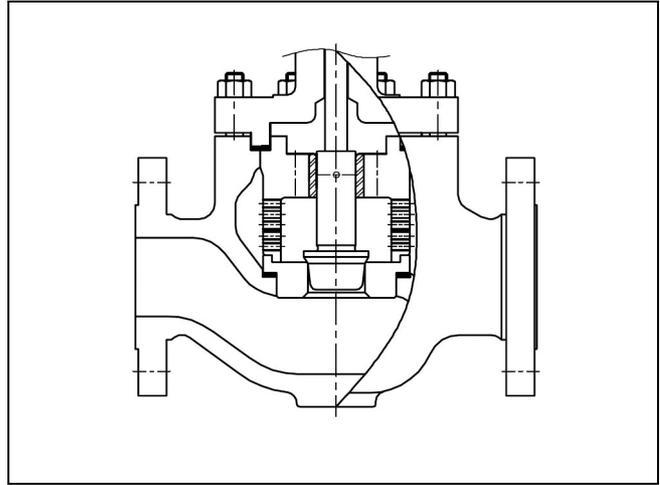

Contoured trim

Quick change, standard contoured trim

Quick change standard contoured plug offers a smooth flow profile. The trim is most suited to low pressure drop application and is used in the majority of control applications.

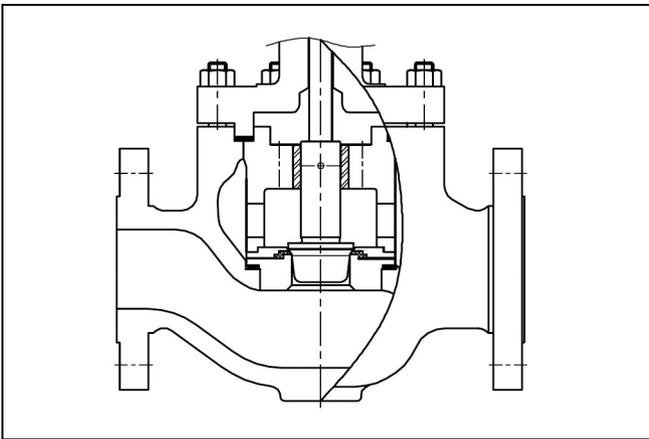

Tendril (multi-hole, multi-stage) trim

Tendril trim

The trim design is a multi-stage, multi-hole trim. There are 1 and 2 stage designs available depending on pressure drop and potential for cavitation. The pressure drop is divided between the stages so that the pressure progressively reduces as it passes through the stages of the trim. This gives excellent resistance to cavitation on high pressure drop applications.

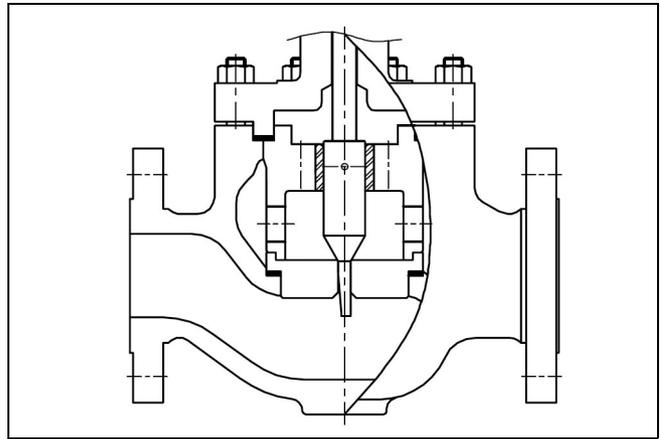

Contoured soft seat trim

Soft seat trim

An alteration of the standard contoured trim is the soft seated option. The seat ring is manufactured with a clamped on shroud which locks the soft seated ring in position. When the soft face contacts the seating point it deforms the softer ring ensuring a high degree of closure. The soft seated trim is used on applications where bubble tight shut off is required.

Micro trim

Micro trim

The micro trim design is seat guided construction, capable of handling high pressure drops, without instability problems. This trim design has an inherent characteristic of linear, and has excellent rangeability. It is an ideal selection for the control of very low flow rates. Please contact Metso for micro trim applications.

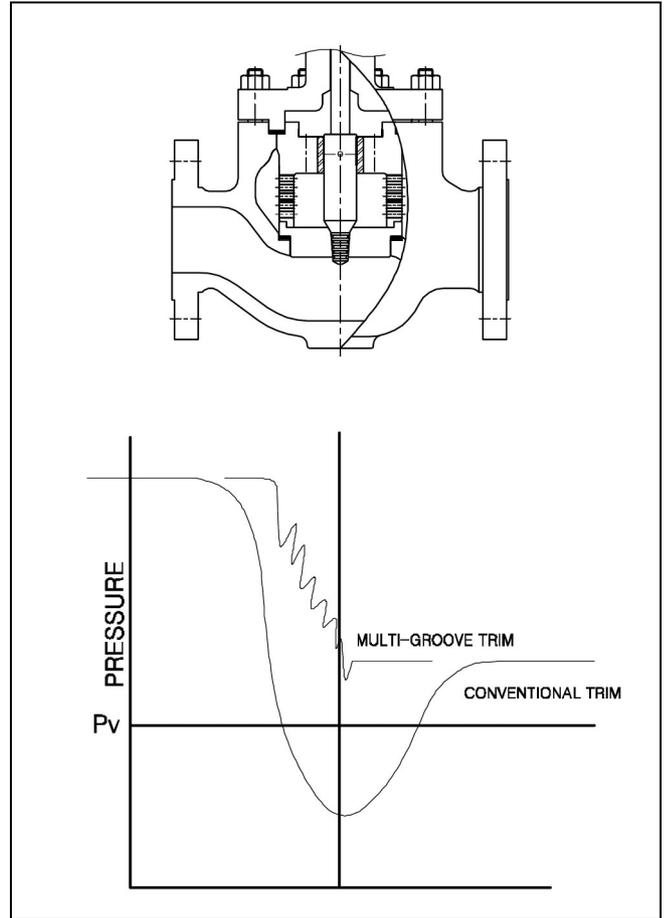

Different trim designs

Multi-groove trim

Multi-groove trim for non-compressible fluid applications is designed for any number of grooves required for preventing cavitation and eventual erosion from occurring. There are 7... 9 grooves designs available depending on pressure drop and potential for cavitation. The fluid passes through the flow path generated by incorporating angled flats onto the surface of the plug together with a cut out on the internal surface of the seat.

The pressure drop is divided across the stages of the trim so that the pressure drop progressively reduces as it passes through the grooves of the trim. This gives excellent resistance to cavitation on high pressure drop applications. For very high pressure drop applications the plug and seat insert would be manufactured from solid stellite and tungsten carbide or advanced glass metallic optionally. Please contact Metso for multi groove trim applications.

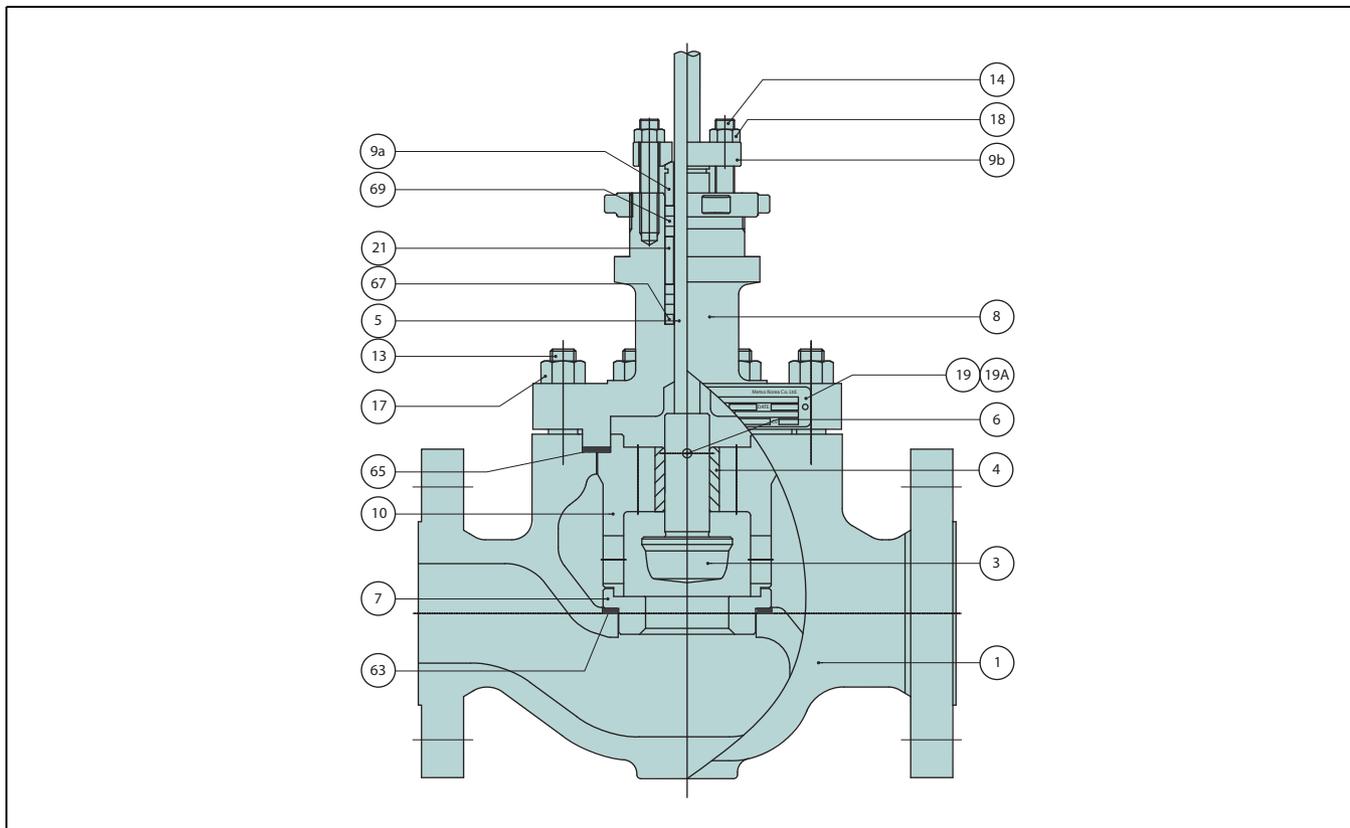

Multi-groove

Optional body size				
04	4" / DN 100	YY	Special	

3.	PRESSURE RATING			
C	ASME Class 150	D	ASME Class 300	
Optional pressure rating				
F	ASME Class 600	Y	Special	

4.	END CONNECTION			
W	Flanged RF, ASME B16.5			
Optional end connection				
V	Socket welding, ASME B16.11			
Q	Butt welding, ASME B16.25			
Z	Ring joint flange, ASME B16.5			
Y	Special			

5.	BONNET CONSTRUCTION			
Bonnet type		Actuator connection		
A	Standard	Standard actuator size		
B	Standard	Applicable for VD_48/55 (3",4" only)		
Optional bonnet construction				
E	Extension	Standard actuator size		
F	Extension	Applicable for VD_48/55 (3",4" only)		
L	Bellows seals	Standard actuator size		
M	Bellows seals	Applicable for VD_48/55 (3",4" only)		
Y	Special	Special		

6.	BODY & BONNET MATERIAL			
J2	A216 gr. WCB	S6	A351 gr. CF8M	
Optional Body & Bonnet Material				
S4	A351 gr. CF8	S9	A351 gr. CF3	
S1	A351 gr. CF3M	YY	Special	

7.	BEARINGS (TRUNNION / THRUST BEARING)			
X	Not applicable	Y	Special	

TRIM CONSTRUCTIONS

8.	PLUG MATERIAL		
Material		Description	
P1	410 SS	Standard for carbon steel body	
T6	316 SS	Standard for stainless steel body	
Optional plug material			
VM	Alloy 6	Stellite 6 Alloy steel	
YY	Special	Special materials	

9.	PLUG APPLICATION		
X	Not applicable		
A	Cobalt based alloy		
Optional plug application			
Y	Special		

10.	STEM MATERIAL		
Material		Description	
BC	630 SS + HCr	Standard for carbon steel body	
TC	316 SS + HCr	Standard for stainless steel body	
YY	Special	Special materials	

11.	SEAT TYPE		
S1	Single metal seat		
Optional seat type			
T1	Single soft seat		
YY	Special		

12.	SEAT / RETAINER MATERIAL			
Seat		Retainer		Guide bushing
R1	CA15 / 410 SS	CB7Cu-1 / 630 SS		AISI 440C
T6	CF8M / 316 SS	CF8M / 316 SS		AISI 316 + Alloy 6
YY	Special	Special		Special

* CA15 / 410 SS is the standard material for carbon steel body.

** CF8M / 316 SS is the standard material for stainless steel body..

13.	SEAT APPLICATION		
X	Not applicable		
A	Cobalt based alloy		
Optional seat application			
p	Insert PTFE		
R	Insert RTFE		
Y	Special		

OTHERS

14. PACKING TYPE	
S	Standard
Optional packing type	
L	Live loaded packing
B	Bellows Seal (316L SS, Welded)
C	Bellows Seal (304 SS, Formed)
Y	Special

15. PACKING MATERIAL	
G	PTFE Carbon fiber
Optional packing material	
F	Graphite (with mold and braided)
Y	Special

16. SEALS MATERIAL	
X	Not applicable
Y	Special

17. GASKET MATERIAL	
S	S/W gasket type, 316 SS + Graphite for standard
Optional gasket material	
H	S/W gasket type, 316 SS + Graphite for high temp.
L	S/W gasket type, 316 SS + PTFE
Y	Special

18. STUD / NUT MATERIAL	
A	A193 gr. B7 / A194 gr. 2H
B	A193 gr. B8 / A194 gr. 8
Optional bolting material	
H	A193 gr. B16 / A194 gr. 4
Y	Special

19. OPTIONS	
X	Not applicable
E	Anti-erosion
L	Lub. & Isol. valve
W	Water seal
Y	Special

* The body, bonnet, trim materials are subject to change as equivalent depending on detail design.
